Research and Teaching Experience

September 2014 – present
INRA, French National Institute for Agricultural Research, **Researcher**. Research on pests and helpers community dynamics in cropping systems relating to agricultural practices and landscape management. Agronomy and Environment Department.

November 2023
Tutoring of group project M2 on the *Interest of climatic analogues in adaptation to climate change.*

November 2021 – present
University Paris-Est Créteil (UPEC), 3h course "Integrated Pest Management".

November 2015 – present
University Paris-Est Créteil (UPEC), 3h course "Modeling of natural regulations in agriculture".

September 2010 – August 2014
University of Pennsylvania, Perelman School of Medicine, Philadelphia, USA. **Postdoc**. Research on population dynamics and control of domiciliated triatomine bugs (*Triatoma infestans*) in the city of Arequipa. Mentored by Michael Z. Levy.
Occasional teachings:
2012 Communicable diseases: Chagas disease. Introductory lecture at undergraduate level.
2013 Introduction to data analysis in R. Lecture for graduate students in epidemiology.

September 2006 – August 2010
University of Perpignan, France. **Lecturer/PhD student.** Research on population dynamics and control of non-domiciliated triatomine bugs (*Triatoma dimidiata*). Teaching informatics and mathematics applied to biology. Lecture, creation of exercices, examination.

January – May 2006
University of Perpignan, France. **Research internship**. Modeling insecticide effects on the population dynamics of triatomine bugs.

September – December 2005
University of Rennes, France. **Research internship**. Behavioral experimentation on parasitoids with perspectives of biological control.

February – April 2003
Institut cellule souche et cerveau, Bron, France. **Research internship**. Statistical analysis of extra-cellular neuronal activity.

July – August 2002
University of Perpignan/University of Sussex. **Research internship**. Modeling the effects of mating on epidemiology.

Expertise activity

Comity member, intuitu personae of the « Comité Scientifique et Technique Ecophyto » since june 2021.
Comity member of ANR « AAP générique » CES : CE32 - Dynamique des socio-écosystèmes et de leurs composants en vue de leur gestion durable, 2021, 2022 et 2023.

Expert for the « Expertise collective » « Natural regulation » 2021

External evaluation of project for Ecophyto grants : 2017, 2019, 2020, 2022

Participation in PhD comittees (comités de thèses)

- Marianne Doehler, 2022-2024
- Lucas Etienne, 2020-2022
- Emeric Courson, 2020-2022
- Nirina Ratsimba 2016-2020

Students tutoring

Post-doctorate mentor
2020-2022 Sixtine Cueff
2019-2020 Blanche Collard
2014-2015 Cynthia Bellouin

PhD level official adviser
2014-2016, Amandine Juhel, école doctorale ABIES, UMR Agronomie.

PhD partial supervision leading to publication
2016-2018, Mauricio Zanovello-Schuster, Universidade Federal do Paraná/INRA UR P3F.
2010-2013, Ricardo Castillo-Neyra, John Hopkins University.
2010-2013, Andrew Hong, Wharton school of business, University of Pennsylvania.

Master level
2023, Clément Chevaleyre, stage ingénieur/M2
2022, Abou Cissé, M2, Modelling of annual pressure of bioagressors in metropolitan grain fields.
2021, Mariem Ben Ali, M2, assessment of impact of birds on grain crops at sowing.
2020, Iris Bertin, M2, assessment of impact of non-treated agricultural fields legislation (ZNA)
2020, Elvia Julieth Arellano Ortiz, M2, teledetection of Oil seed rape stages
2020, Chhivchung Lay, M2, big data on yield of grain crops
2020, Katlego Ntwampe, M2, statistical modeling of the presence of grain crop pests
2019, Khalid Bouabdallaoui, M2, device detecting birds in grain crops
2018-2019, Thomas Delaune, stage final ingénieur (niveau M2)
2019, Sahar Abid, stage M2, encadrement 10 %
2018, Jihane Drissi, stage M2
2017, Ryohei Chiyojima, stage M2
2016, Mathilde Chen, ingénieur/M2
2016, Nicolas Guérin, stage M2
2016, Jérôme Pivert, stage M2
2016, Vincent Vivet, stage M2

Other

2022 – Anna Sadaoui, L3, 2 mois, handling of repeated detection of birds or mouvements
2021 – Inès Arif, L3, 3 mois, detection of birds in fields after sowing, evaluation and improvement.
2020 – Lucas Monnier, L3, 3 mois, detection of birds in fields after sowing, modelling.
2020 – Vasilis Cako, M1 5 mois, Realization of a webapp to visualize the impact of climate change:

Climate Change Explorer
2019 – Antoine Brasset, M1 3 mois, Satellite imagery based detection of damages in canola fields.
2018 – Simon Kiene, M1 3 mois, analysis of presence of pests of wheat and impact on yields.

Education

2013
French national license for Museum teaching and research in populations biology.

2012
French national certificate in Supercomputing (Certificat de Compétence en Calcul Intensif).

2010
French national license for University teaching and research in populations biology

2006-2009
University of Perpignan, Perpignan, France. **Ph.D. in Biology (Population dynamics)**. Study and control of population dynamics of non-domiciliated triatomine bugs. "Très honorable avec félicitations orales du jury" (~ Maxima Cum Laude). Student body President for 2009-2010. Student senator for 2008-2010.

2005-2006
École Normale Supérieure de Lyon, Lyon, France. **M.S. in Molecular and Cellular Biology**, with honors.

2004-2005
"**Agrégation**" - **Life and geological sciences.** French "outstanding teacher's" licence, a national competitive essay. Selected. Prepared at University of Rennes 1, Rennes, France.

2003-2004
"Certificat d'Aptitude au Professorat de l'Enseignement du Second degré" - Life and geological sciences. French standard teacher's licence, a national competitive essay. Prepared at École Normale Supérieure de Lyon.

2002-2003
École Normale Supérieure de Lyon. **M.S. in Molecular and Cellular Biology**, first year, with honors. Student senator.

2001-2002
École Normale Supérieure de Lyon, Lyon, France. **B.S. in Molecular and Cellular Biology.**

1998-2001
Fénelon High School and Henri IV High School, Paris, France. Preparatory classes for entrance to Grandes Écoles, admitted in Ecole Normale Supérieure de Lyon as "normalien": exceptional distinction allowing to be paid as a student civil servant.

Funding sources

Regular grants

CERES, Banque des territoires, démonstrateurs territoriaux, des transitions agricoles et alimentaires (5.3 M€)	2024 – 2031

"New agro-ecological practices dedicated to agricultural sectors for the implementation of a sustainable and traced agriculture at the service of the Territory."

Role: **Co-I, task leader "Data intelligence: specifications and algorithms for relative performance"**

Astae-3C, PEPR Agroécologie et Numérique (144 k€)	2024 – 2027

"Assurabilité de la Transition Agro-Ecologique dans un Contexte de Changement Climatique", Role : **PI, PhD Supervisor.**

SEPIM, "plan betterave" call (702 k€)   2021 – 2023

"Surveillance, Évaluation, Prévision, Interpolation et Mitigation des risques relatifs à la jaunisse de la betterave". Role : **Co-I and steering comity member**, PI : Samuel Soubeyrand.

MoCoRiBA-GC, Ecophyto maturation (420 k€)   2020– 2022

Modélisation et Communication du Risque lié aux Bio-Agresseurs des grandes cultures
Role: **PI**

C3PO, institut Carnot Plant2Pro® (150k€)   2019-2021

Compter Cartographier et Caractériser pour mieux Prévenir les dégâts d'Oiseaux, réalisation d'un boitier caméra reconnaissant et cartographiant en temps réel les oiseaux aux semis.
Role: **Co-I**, **Work Package leader** PI: Christophe Sausse

AviNODU (136k€)   2019-2020

AviNODU Analyse des Variations Interannuelles des ventes de produits phytosanitaires et de l'indicateur NODU. Décembre 2020. Financé par l'OFB, en partenariat avec le MTES et le MAA. **Co-I, in practice leader of the investigation**. PI : Thomas Poméon**.**

TOSCA, appel PARCELLE du CNES   2019-2020

Production cartographique par télédétection. Financement de stages de Master. Role **Co-I,** PI : Mathieu Fauvel

R2D2, EcoPhyto DEPHY EXPE (640k€)   2018 – 2024

Restauration de la régulation naturelle et augmentation de la Robustesse des systèmes de culture des plateaux de Bourgogne pour une réduction Durable de la Dépendance aux insecticides
Role: **Co-I**, PI: Nicolas Cerruti

GIS GC HP2E (10k€)   2016– 2017

Analyse des liens entre présence de bio-agresseurs et éléments paysagers en croisant données d'épidémiosurveillance (Vigicultures), données de la PAC (RPG) et données de la végétation (BDTOPO, IGN) et éclairage par de l'élicitation d'experts
Role: **PI**.

API-SMAL, LabEx BASC (268 k€)   2016 – 2019

Agroecology and policy instruments for sustainable multifunctional agricultural landscapes
Role: **Co-I, workpackage leader**, PI: V. Martinet.

INDISS, LabEx BASC (280 k€)   2010 – 2011

Innovation and Design In Sociotechnical Systems
Role: **Co-I**, PI: MH Jeuffroy et JM Mayard

1R01AI101229 (Levy), ~ 4 M$ 2013 – 2018

Disrupting Vector-Borne Disease Transmission In Complex Urban Environments
Role: **Co-I/Postdoc**, PI: M.Z. Levy.

Global Engagement Fund, Upenn, (40 k$)   2011 – 2012

Real-Time Control of Re-emerging Chagas Disease Vectors in Arequipa, Peru.
Role: **Co-I/Postdoc**, PI: M. Z. Levy.

3-K01-AI-079162-03S1 (40 k$)   2010 – 2011

Administrative supplement to mathematical techniques for control of epidemic *Trypanosoma cruzi* transmission.
Role: **Postdoctoral Trainee**, PI: M. Z. Levy.

Grants in computation hours

IDRIS i2010032290, i2009032290 and i200882290   2008 – 2011

Contrôle spatialisé d'un vecteur de la maladie de Chagas dans un village réel
Role : **Co-I**, PI S.Gourbière. 1,400,000 hours on BlueGene/P and 90,000 on IBM cluster.

Awards

Editor's choice and Research for "Landscape drivers of pests and pathogens abundance in arable crops" in Ecography, October.

SERdigital 2013 top presentation in Statistical Methods for « Synthetic likelihood approach for quantifying multi-scale epidemic processes from large and complex data sets ». Provides a scholarship to present my project at the 2014 national Society for Epidemiological Research meeting and publication of the abstract in American Journal of Epidemiology.

Skills and techniques

Statistics and modeling
Cellular automata (stochastic and mean field approximation)
Random Markov Gaussian fields
Modeling of imperfect observations
Glm, mixed models
Time series analysis (Cox model, life history tables, Leslie matrices, etc.)
Permutation methods (Random labeling, Bootstrapping, Jack-knife)
Power analyses
Adaptive sampling

Model fitting / Optimization
MCMC: Metropolis-Hasting sampling, Gibbs sampling
Approximate likelihoods (synthetic likelihood, ABC)
Genetic algorithms

Computational skills
Programming languages: R, C(MPI), bash, javascript, php, python, perl, tcl/tk, matlab.
Best programming practices: litterate programming, unit testing, version control (git).
Data management: mySQL, file server administration.
System administration: Linux, Mac desktop, Windows desktop.

Languages
French: native language
English: Fluent
Spanish: Fluent

Editorial activities

Reviewer for Pest Management Science, Agronomy for Sustainable Development, European Journal of Agronomy, Innovations Agronomiques, Landscape and Urban Planning, Journal of Racial and Ethnic Health Disparities, Journal of Epidemiology & Community Health, American Journal of Public Health, PloS Neglected Tropical Diseases, American Journal of Tropical Medicine and Hygiene, Comptes rendus de l'Académie des Sciences section Biologie, PloS ONE, Journal of Theoretical Biology, Pathogens and Global Health.

Membership in professional societies

Association Française d'Agronomie, since 2015

American Society of Tropical Medecine and Hygiene, 2012-2014

Society for Epidemiologic Research, since 2013-2014

Work picks up in industry and services

2024-08 Integration of the CCExplorer calculator in the tool "Territoires d'abondance" by "Les Greniers d'abondances" to offer local authorities climate analogues (https://territoiresfertiles.fr/) among other characteristics concerning the sustainability of their territories.

Oral communications

Invited talks

1. Les analogues climatiques, un outil pour mieux comprendre notre futur et s'y préparer ? Présenté par Nathalie de Noblet-Ducoudré. Collège des bernardins.

2. MoCoRiBAViz. Les OAD produits par les laboratoires des instituts Carnot. LFDAY. 21/05/2024

3. Changement Climatique : Découverte et perspectives d'évolution de CCExplorer. VivAgriLab Terres et cités. Versailles, 12/12/2023.

4. Reconnaissance optique et ouverture vers des dispositifs d'alerte et d'effarouchement réactifs. Colloque Dégâts d'oiseaux aux cultures : quelles solutions ? Paris, 24/11/2022.

5. Paysage, bioagresseurs et risques en grandes cultures. Journée Science & Partenariat « Epidémiosurveillance » de l'institut Carnont Plant2Pro. 09/11/2023 – Paris, Le Hub BpiFrance.

6. From human to plant diseases, robust and transposable approaches in the big data era to control pests. Invited keynote speaker, 7th International Congress of nematology (ICN2022). Antibes Jean-les-pins. France

7. Eléments paysagers, bio-agresseurs des grandes cultures et agro-écologie. Journée nationale des animateurs du réseau d'épidémiosurveillance en grandes cultures, ministère de l'agriculture. 13 février 2018.

8. Paysage et jeux de données nationaux, après-midi de travail Mardi 18 juillet 2017, INRA de Toulouse.

9. Peerless project 2015 annual meeting, INRA Angers. Utilisation de la vraisemblance synthétique pour estimer des paramètres de dynamique des populations à partir de données spatio-temporelles. [Use of synthetic likelihood to estimate population dynamique parameters using spatio-temporal data].

10. SER National meeting June, 2014. *Synthetic likelihood approaches for quantifying multi-scale epidemic processes from large and complex data sets*.

11. Princeton University. RAPIDD Epidemiological Dynamics workshop invited by Brian Grenfell. October 2013. *Synthetic-likelihood Inference for individual-based models.*

12. Temple University, Philadelphia, PA. Job talk, invited by Jody Hey. October 2013. *Understanding insect population dynamics through imperfectly observed presence/absence patterns*.

13. Ministère de la santé de la province d'Arequipa, journée des promoteurs de santé du printemps 2013, présentation de mes travaux de recherche et de leurs implications pour la gestion des vecteurs de la maladie de Chagas dans la ville d'Arequipa.

14. University Lyon 1, France. Job talk, April 2012. *Quantitative modeling and predictive analytics applied to eco-toxicology.*

15. Université de Reims, France. Job talk, Mai 2012. *Modeling in animal éco-toxicologie.*

Oral communications in peer-reviewed conferences

16. Devaud, N and **Barbu, CM**. *Quantification de l'efficacité des pratiques de contrôle des maladies en grandes cultures en France*. Végéphyl – 12e Conférence internationale sur les maladies des plantes. Tours – 11 ET 12 décembre 2018, Tours.
